

What's New in erwin® Data Intelligence 11 by Quest®

erwin® Data Intelligence 11 by Quest® delivers expanded data landscape and data governance visibility, new capabilities to speed data discovery, and offers flexibility in language choice to broaden the audience for organizational data literacy. New data catalog and data stewardship dashboards and enhanced mind maps provide new vantage points, while AI optimization and asset tagging further shorten discovery time and lay the foundation for automated governance. Performance, search and usability enhancements additionally streamline daily workflows.

If you're an erwin Data Intelligence customer with a current maintenance subscription, submit your download request today to gain access to these software enhancements:

New within erwin Data Catalog by Quest:

- A data catalog dashboard that provides new transparency and analysis to holistically understand and manage your data landscape from an IT perspective

New within erwin Data Literacy by Quest:

- A data literacy dashboard that makes it easy to see and drill into key data stewardship statistics and actions needed to guide data governance efforts. Enhanced mind map capabilities provide data stewards and owners the ability to view multiple business assets and associated relationships simultaneously.
- Enterprise tagging of business assets to speed future discovery and aid in analysis and automation
- AI optimization to expand and increase accuracy of data asset discovery

Across the erwin Data Intelligence Suite:

- Flexibility to define technical and business metadata in a language other than U.S. English for customers using the SQL Server version of erwin Data Intelligence
- Performance, search and usability enhancements to simplify and speed daily workflows

For IT and data governance teams alike, erwin Data Intelligence 11 offers expanded visibility and new capabilities to speed the everyday tasks that fuel organizational data intelligence.
